

Gorman Zachary Sewell

Software Developer / Full Stack Developer / Frontend Developer

214-930-7205 | gzsewell@gmail.com | Oklahoma City, OK | [linkedin.com/in/gzsewell](https://www.linkedin.com/in/gzsewell) | github.com/gzsewell

PROFESSIONAL SUMMARY

Strengths: Development, Project Management, Team Success, Strong Attention to Detail, Full Stack application development using PERN stack. Front end development using React and Node. Back end development using PostgreSQL and Express, OpenAI.

Configuration Technician: Debugging, troubleshooting quality assurance storage systems at Hitachi Vantara. I am motivated to reach higher, sharpen and broaden my skills to better perform for my team. I simply love development.

TECHNICAL SKILLS

Node, Javascript, React, Typescript, Next.js / Redux, Git, Express, PostgreSQL / HTML5, CSS3, TailWind / Python / AWS, Google Cloud Services (GCS) / Hugging Face, Agentic A.I. / Full-Stack Developer / Curious, Ever Learning

TECHNICAL PROJECTS

Food Celebrator | **Back End / Front End / QA / UX/ UI / Project Planning** | 03/2025 | [Link to the project](#)

- Primary responsibility included routing the backend of the application and fixing bugs as the front end developed.
- Some of the technologies that I used are axios, cors, multer for image uploads, jwt, bcrypt, Google Cloud Tools, such as Vision AI and Google Cloud Storage, React-Router-DOM, React-Spinners and Browser-Router.
- I worked on organizing the Back-End features and polishing the Front-End by fixing bugs and overall enhancing UI/UX. On the back-end, I handled photo uploads, routes, server development, and assisted with hosting the application to Render.

Cinetrail | **Sole Developer** | Dec/2024 | [Link to the project](#)

- Cinetrail displays up and coming movies with descriptions, ratings, genres, and trailers.
- Expansive understanding of API's was needed to properly display the needed information to the end user.
- React, Node, Browser Router, react-router-dom, movie API, and CSS.

Book Buddy | **Sole Developer** | Feb/2025 | [Link to the project](#)

- Book Buddy was a fun challenge in manipulating a given API to work like your local library.
- Allowing each user to view the library and checkout a book that is not currently checked out by another user and displaying checked out books to your account page.
- Logged in view shows your account page with checked out books where non logged in view shows you the library of books without the options to checkout books.
- JWT was used to verify users and remain logged in.

EXPERIENCE

Full Stack Developer | Groovy Cad | Dallas, TX

August 2025 - present

- Sales Manager
- Full stack Developer

Configuration Technician | Hitachi Vantara | Norman, OK

November 2022 - 2024

- Configured enterprise RAID and hybrid cloud systems to customer specifications.
- Developed and implemented new processes that allowed for better readability and understanding of the configuration process.
- Led group projects to increase efficiency.
- EOQ targets exceeded consistently.

Operations Manager | Frontier Produce | Moore, OK

July 2016 - 2022

- Developed and maintained website

- Logistics
- Supply Chain Management
- Increased delivery efficiency by 12%
- Inventory Management

EDUCATION

Fullstack Academy Web Development Bootcamp

Nov. 2024 - March 2025

Software Engineering Certificate

Immersive software engineering coding bootcamp focused on mastering HTML and JavaScript foundations, front- and back-end development using React, Express, Node, and databases (PostgreSQL).

Mid-America Christian University

July 2020 - June 2024

Bachelor of Science in Business Admin and Management Information Systems

Applied business administration focusing on application of servers storage and security from a technical and business perspective.

Moore Norman Technical Center

March 2019 - April 2020

UX/UI Digital Marketing Certificate of Completion

Hands on experience with User Experience and User Interface from a Digital Marketing perspective.
